

2nd Grade Square of Life Project

Mrs. Beck's Class

Centreville Elementary School

Centreville, VA

# Introduction to Activity

Our class worked in groups to learn about the project. We watched a *Cookie Monster* video on living and nonliving things. It was awesome, cool and fun!

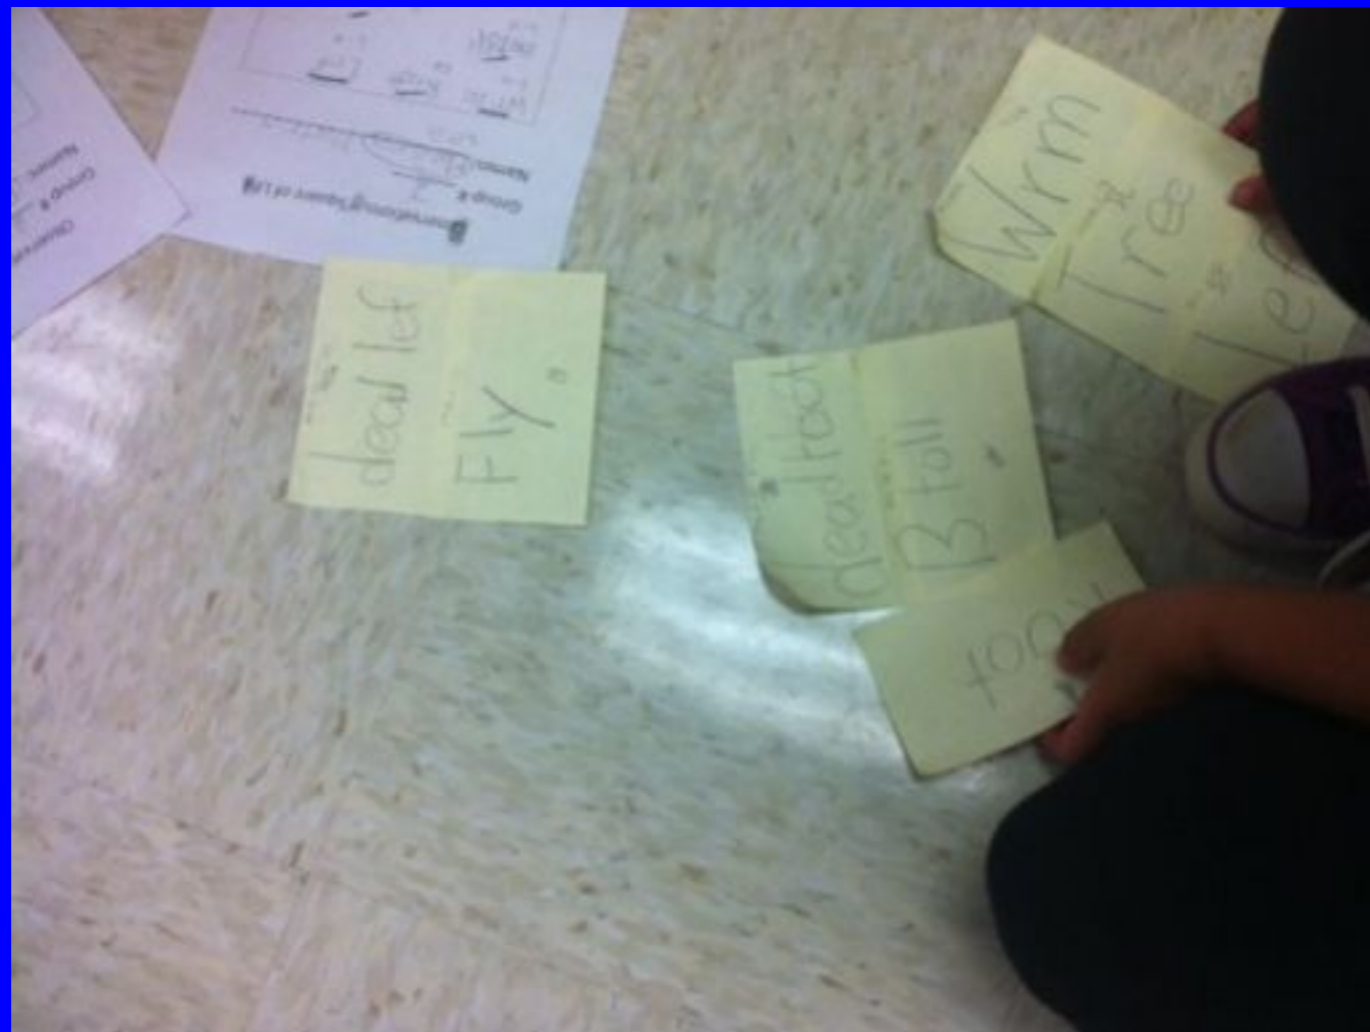

# Field Trip to Our Square

Our class took a field trip to our square.  
We had groups . Some of us was on the grass  
and some of us were on the dirt.

We wrote down our observations on sticky notes. We sorted them into plants, animals, and non-living things.

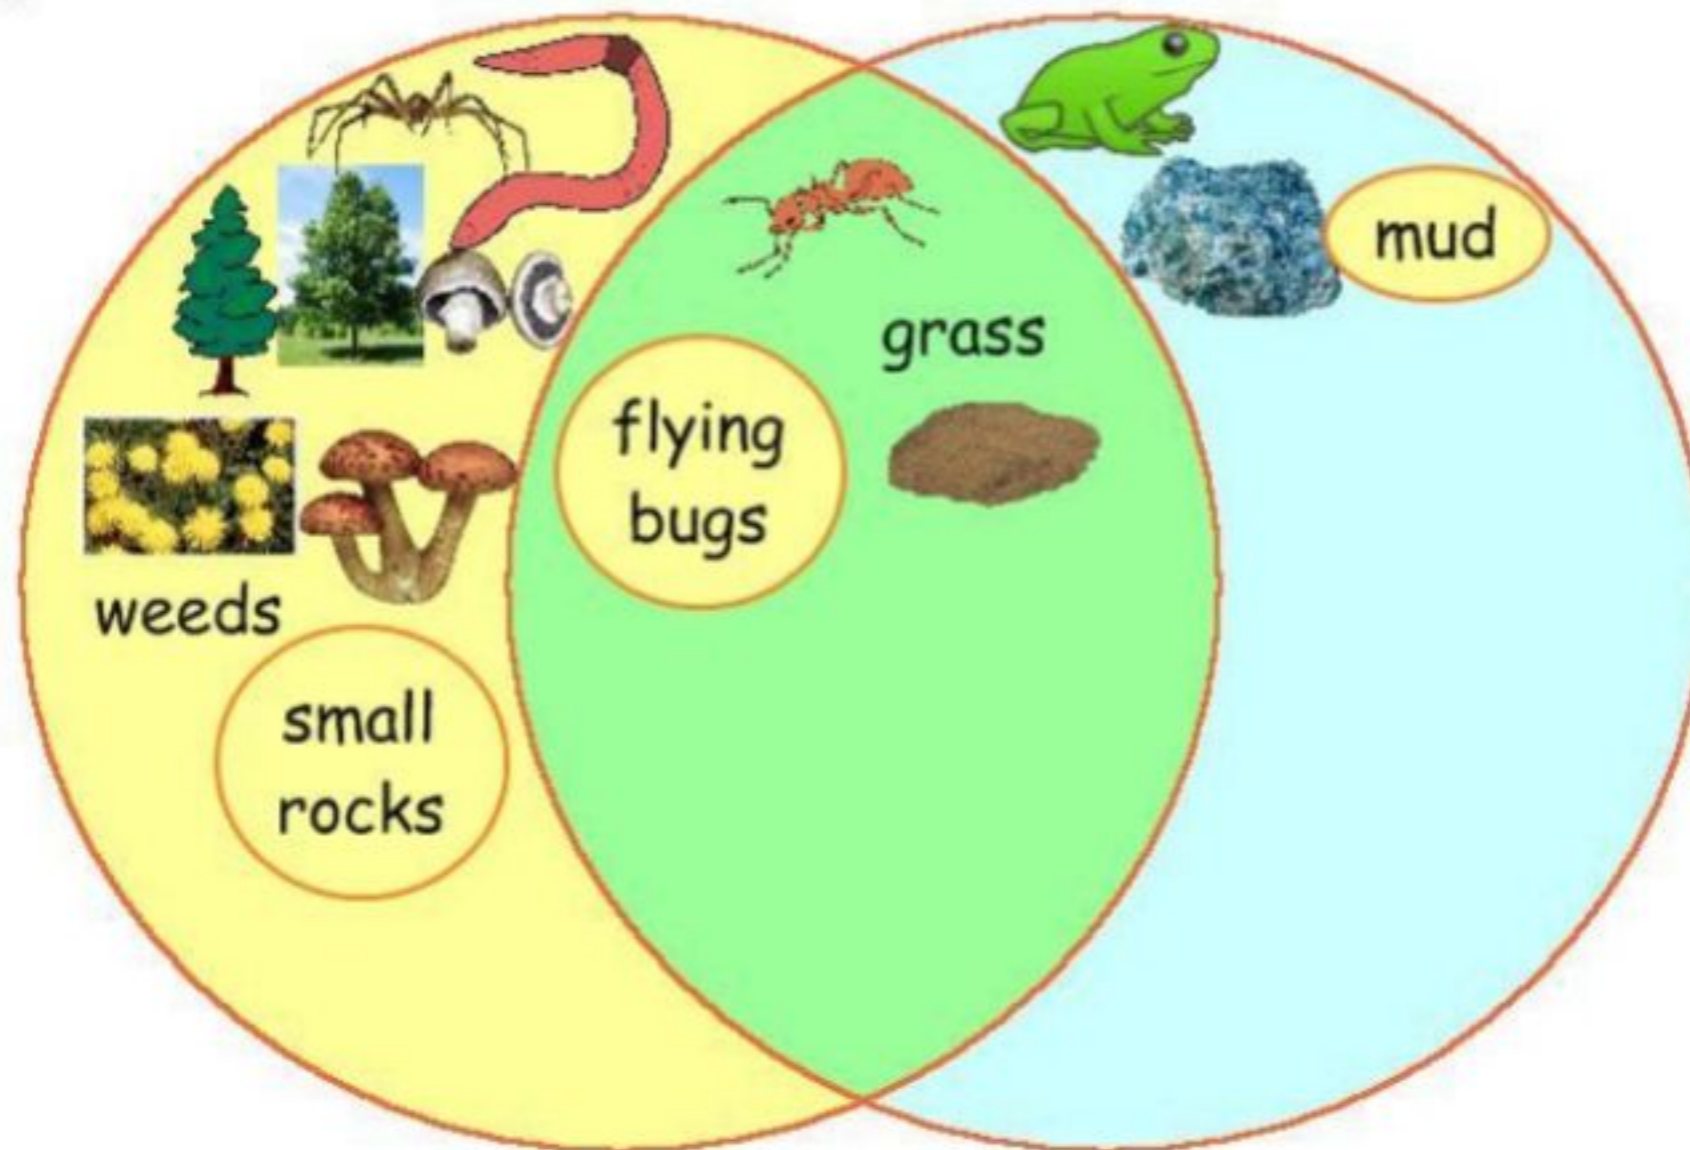

# We made a venn diagram using Kidspiration.

## Square of Life Comparison Chart

Ossian Elementary  
Ossian Indiana

# Conclusion

We learned that things are non living and they are living.

Things like plants and animals are living. Non living things are wood, windows, toothbrushes, tables and cars that are fast.
