Flying bugs Bee Caterpillar Bush Mushroom Moss Flowers (pink) **Walnut Shell Helicopter seeds (maple)** Other seeds Rubber Yellow birch leaves Tree roots **Twigs** Metal **Paper Nails** Mud **Animal hole** Concrete **Big Rock** Paper cup Piece of glass Brick Wood chips String

Our Observations:

We were excited about all the things we found. Both Schools found many living things. There were two things that Central Elementary found that we are not familiar with: the Giant Rhododendron leaf and the Yellow Star grass root. The common earwig is not a bug we commonly found in the ground. We found more non-living things than Central Elementary.
