

## Learn and Have Fun with Art + Engineering Design

### STEAM Summer Academy 2017

Fun for Middle School Girls and Boys!

**Everyone is talking about STEAM:** Bringing together art with science, technology, engineering and mathematics (STEM). In the STEAM summer academy, students will engage in creative and innovative pursuits to explore connections and develop products that blend engineering design and artistry.

**Stevens STEAM History:** Stevens has a rich history of merging engineering with artistry, and STEAM students will engage in activities such as designing kinetic sculptures, three-dimensional mobiles, solar photovoltaic trees and much more. **No prior experience is needed!**

**Spend a week at the scenic campus of Stevens!** The summer academy will be held at Stevens Institute of Technology where each day will start with exciting team activities before groups launch into STEAM activities. Afternoons will be filled with team games, guest speakers, campus tours, and more.

**Dates:** July 31st—August 4th, 2017  
**Time:** 9am—3pm daily  
**Place:** Stevens Institute of Technology  
Hoboken, New Jersey  
**Cost:** \$575 includes lunch each day  
**Who:** Open to all rising middle school girls and boys (must be entering grade 6, 7, or 8 in September 2017)
